THE GLENOLIA

LEARNING TOGETHER

Weather watchers

Observer / group code: _____ | Place: _____

Observe from a safe, teacher-approved place. Do not go outside in unsafe heat, storms or other hazardous conditions.

Date / time	Sky	Air temp. °C	Rain seen?	Wind clue	Method / source

Record what you observe. A blank means missing, not zero. For an app, keep its source and time: label estimates and forecasts separately from instrument readings.

One thing I noticed

THE GLENOLIA

LEARNING TOGETHER

What pattern might be here?

Compare records made in the same place and with a clear method.

A pattern I noticed

Which dated observations support this idea?

What might affect the comparison?

Time, shade, instrument, location or a missing observation?

A next question

What could we observe next without assuming the answer?

Weather changes. A few observations describe this record; they do not prove a climate trend.
